REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: There is no reasonable expectation of success for using the cling film of Lipman in the operation of Herbin et al (in place of the adhesive coated protective film therein) for the attachment of the lens protected with the cling film to the block with an adhesive wherein the protective film is disposed between the lens and the adhesive of the block. More specifically, while it would have been understood to utilize the cling film of Lipman in place of the protective film of Herbin et al, one doing such would have been motivated to utilize the cling film with the opening in it as defined by Lipman. Additionally, there is no express teaching that the adhesive protective film of Herbin would have bonded to an adhesive as the block in Herbin was a low melting point metal which was formed on the back of the lens (and onto the protective film). There is no appreciation that an adhesive would join to the protective film of Herbin to attach the block to the lens through the protective film described at column 1, lines 10-23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
